*Flower Seed Growers*

**SANTA MARIA, CALIFORNIA**

# 1959

## Seed Growing Contract

To:

The William Macdonald Seed Co.

Santa Maria, California

Gentlemen:

Kindly enter our order for delivery from 1959 crop on the quantities and varieties of Flower Seeds indicated in this catalog. Also mail us a detailed acknowledgment of this order for our files.

Shipment is to be made as per instructions marked on this page from 1959 harvest seed. If any varieties cannot be booked now, please advise promptly. Be sure to send us another list to replace this one.

It is understood that this order is placed subject to the standard Terms and Conditions of Delivery as outlined on page 3 of this catalog. Please adhere carefully to the following special instructions:

## For the Seed Trade

Planting conditions for the 1959 crop have been about normal. It is too early to say how the weather will influence crops in 1959, but most of us know what it did last year. Many crops were short and those who were gambling on surplus were hurt.

Future contracting is safe insurance as there is not the speculation with seed growers to raise surplus due to rising costs. Why take the risk of spot buying? Quality seed is not bought at the cheapest price and a satisfied customer is worth more than the difference in price.

MACDONALD'S, California's Best Flower Seed Grower, take an unsurpassed climate, quality seed and blend in scientific production methods to produce the top quality seed that we offer. We are confident you will find our prices reasonable and your customers will remember our quality long after the price is forgotten.

If you are in need of an item in a hurry, our SERVICE is tops—spot orders are shipped the same day as received.

Our flower fields are in bloom between May and September and we cordially invite you to visit us in Santa Maria. We are centrally located, about halfway between San Francisco and Los Angeles, on Coast Highway No. 101. Pacific Air Lines provide four flights daily.

It has been a pleasure doing business with you and we look forward to serving you in 1959.

# Terms and Conditions of Delivery

All seeds are offered F.O.B. Santa Maria, California, for delivery from 1959 crop as soon as possible after harvest. Invoices to firms of established credit are subject to a discount of 1% for cash in 30 days from invoice date, or 60 days net. New customers should furnish two credit references if shipment is desired on an open account basis. Otherwise delivery will be made C.O.D. All foreign invoices are payable in U. S. Dollars at the current rate of exchange. All overdue accounts are subject to a sight draft without further notice.

Speedy Air Parcel Post and Air Express service can have your rush orders delivered 24 hours after we receive them. Pacific Airlines, Inc. makes four daily stops in Santa Maria. Air Mail from all major cities usually arrives here the day after posting. We ship spot orders the same day received.

Definite shipping instructions should accompany each order placed, and will be carefully followed by our Shipping Department. In the event instructions are not received, shipments will be forwarded over the most direct and cheapest route. Delivery to the common carrier in good condition will terminate our responsibility.

Prices quoted in this catalog apply against all 1959 crop contract purchases, and are effective immediately on spot orders. We reserve the right to change these prices at any time without giving further notice. We are Wholesale Growers and supply the Seed Trade only.

Bags and containers will be charged at net cost. All orders for four ounces or more will be charged at the pound rate. Due to increased handling costs on small orders, a minimum charge of 50c will be made on each item billed.

We will plant sufficient land to produce the quantity of seed ordered under normal conditions; however, crop failure or any other cause beyond our control releases us from delivery and in the event of shortages, we will fill contract orders on a pro-rata basis only.

The William Macdonald Seed Company warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerance. Seller gives no other or further warranty express or implied.

## **Novelties for Your Best Trade**

**Macdonald**

### **CALIFORNIA POPPY MISSION BELLS (*Macdonald*)**

This is an outstanding new development in *Eschscholtzia*. Mission Bells is a complete mixture of double and semi-double flowers in all the available colors of Poppy. Its many two-tone combinations on large flowers give the mixture a pleasantly pastel effect.

Unlike the regular strains of California Poppy, Mission Bells produce dwarf compact plants which are excellent for borders or bedding.

Plant foliage is a bright green. Many of the flowers have crinkled petals with picotee edges. Color combinations are too numerous to mention, but will include rose and white, scarlet and butter yellow, orange and gold, and pink and amber. Solid shades of cherry red, scarlet, orange, rose, and amber are also in the mixture.

Mission Bells is as easily grown as the regular California Poppy and will thrive in almost any climate.

A very attractive color packet has been produced for Mission Bells by the Schmidt Lithograph Co. in San Francisco. Also a four color plate of our cover picture is available for catalog illustration.

**Per Oz. 1.00**

**Per Lb. 10.00**

### **ALYSSUM COMPACTUM PINK CLOUD (*Macdonald*)**

The habit of Pink Cloud is very similar to Little Gem. It grows to a height of 4 to 5 inches. The flowers are a delightful lavender pink, giving the appearance of pink clouds at sunset. Its dense compact habit and profuse blooms make it excellent for low edgings or ground covers.

**Per Oz. 3.00**

**Per Lb. 30.00**

### **MARIGOLD DWARF AFRICAN NUGGET (*Macdonald*)**

The flowers of Nugget resemble a double *Gaillardia*. They are a deep golden yellow 3 inches in size. Plants are very early flowering. Height ranges from 12 to 14 inches. There is very little foliage which emphasizes flower size.

Nugget does well in any climate, but it is especially adapted to short summers where it is important to have early flowering Marigolds.

**Per Oz. 1.50**

**Per Lb. 15.00**

## Sweet Peas

### **SWEET PEA EARLY MULTIFLORA TYPE (HAC) 300 seeds per Oz.**

This new multi-flowered Sweet Pea class is now in great demand by both home gardeners and florists. Plants are extremely vigorous, producing 18 inch stems that have 6 and 7 florets. Our listing contains most of the original varieties, plus several new seedlings from our own extensive breeding work. This new class is the greatest single development in Sweet Peas for cut flowers in recent years.

# The William Macdonald Seed Co.

## SWEET PEAS EARLY OR WINTER

### FLOWERING STANDARD VARIETIES (HAC)

Our listing includes all of the most important Florist and Home Gardener varieties. These newer sorts feature extra strong growth, long stems, and large flowers—with many being duplexed. Winter Sweet Peas bloom at least two weeks earlier than either Cuthbertson or Summer Spencer types. This is the type for Christmas flowering—either under glass or outside in the milder climatic zones. Sweet Peas have been a Macdonald specialty for thirty-two years. During this period we have originated many current favorites. Let us send you trials for your garden or florist customers. No better Sweet Peas are available anywhere—at any price!

## SWEET PEA SPENCER SPRING FLOWERING CUTHBERTSON AND FLORIBUNDA TYPES (HAC)

This is an intermediate flowering group and best for late spring bloom where some heat resistance is required. They are especially well adapted for growing in mid-western states. Vigorous growth and large flowered. Blooming in the spring two weeks after the Winter Spencers and ten days before the Summer Spencer varieties.

# Larkspur

## GIANT IMPERIAL (HA 4 ft.)

Long a favorite with the Florists and one of our production specialties, the Giant Imperial type Larkspur merits its continued popularity. Plants are tall, compact, with long trusses of florets—and may be found in a complete color range.

## Petunia Grandiflora

These are all hand pollenized varieties and the seed is also carefully hand picked at proper maturity. Much breeding work has gone into selection of color, size and type for the most critical Florist trade. Grandiflora type Petunias are a Macdonald specialty. You can sell them with confidence in good results.

### STOCK GIANTS OF CALIFORNIA (HA 36 in.)

For the commercial cut flower grower, Macdonald's Giants of California varieties are the best Stocks available. This superb branching type produces immense spikes of two inch florets, and averages 70 per cent of doubles. One mammoth spike per plant can be produced, when transplanted four to six inches apart in beds.

## Zinnia

The Zinnia is one of America's two most popular annuals. As it is easy to grow and very showy, one or more of its many varieties are sure to be found in every summer garden. All of our strains are produced from selected stock seed. Individual colors are well isolated to prevent cross pollination. Our fields are carefully rogued for doubleness, color and type. All of the large flowered varieties are handpicked at harvest time. We offer all of the latest novelties. We are confident you will like our quality and seed samples.
